Arrol Devin Pereira

Supply Chain Specialist | Component Engineer

Bangalore, India

+91-709-001-6606 arroldevinpereira13@gmail.com www.linkedin.com/in/arrol-pereira

EDUCATION

Post Graduate Diploma in Industrial Automation and Control Engineering **Oct 2019 - Jan 2020**
Technologics Global Pvt. Ltd., Bangalore, India

Bachelor of Engineering in Electrical and Electronics **Aug 2015 - June 2019**
St. Joseph Engineering College (SJEC), Mangalore, India

12th Grade in Computer Science **June 2013 - Mar 2015**
Padua Pre-University, Mangalore, India

WORK EXPERIENCE

Senior Project Purchaser, *Schneider Electric, Bangalore* **Jan 2023 - Present**
Associate Engineer, *Knorr-Bremse, Pune (**Contract -** SHOBI Solutions Pvt. Ltd.)* **June 2022 – Jan 2023**
Data Transformation Analyst I, *IHS Markit, Bangalore* **Nov 2021 - June 2022**
Project Engineer, *Enventure Engineering LLP, Bangalore* **Feb 2020 - Nov 2021**

Responsibilities:

- Structuring and creating Bill of Materials (BOM) for the product designed under the New Product Development (NPD) program
- Managing high-risk BOM by auditing for high-cost, long lead-time, NRND, EOL and Obsolete components, leveraging technical expertise to qualify Form-Fit-Function (FFF) alternates, securing 100% build availability while mitigating price inflation from independent distributors
- Preparing detailed component comparison reports by analysing datasheets and engineering drawings/3D models using PTC Creo View to ensure 100% adherence to design and quality standards
- Spearheading the maintenance of the company's central component data repository by creating new parts and updating existing parts in the PTC Windchill Product Lifecycle Management (PLM) tool
- Driving the execution of Value Analysis/Value Engineering (VA/VE) and product teardown findings
- Conducting comprehensive should-cost analysis, identifying price variance in supplier quotes and improving negotiation outcomes
- Engaging with suppliers to obtain Request for Quotations (RFQs), clarify technical and commercial requirements and negotiate favourable terms, resulting in cost-saving and staying abreast of new technologies across diverse commodity categories
- Orchestrating Request for Proposal (RFP) events to identify best-in-class technical solutions for complex project requirements from key partners
- Utilising electronic component search engines including Octopart, Findchips, DigiPart and TrustedParts to conduct real-time stock analysis and secure competitive pricing across global authorised distributors and spot buy suppliers
- Utilising Coupa for end-to-end Purchase Order (PO) lifecycle management, ensuring 100% compliance with corporate procurement policies and real-time spend tracking
- Generating weekly Material Shortage Reports (MSR) using Oracle ERP providing real-time visibility of component availability for critical project milestones
- Managing end-to-end supply operations from procurement to distribution, implementing best practices from material inwarding- outwarding and technical inspection to secure storage and retrieval with periodic audits and ensuring on-time delivery of materials to meet production schedules
- Serving as a technical liaison between R&D and vendors during Proof of Concept (POC), prototype, pilot and production

General

- Generated obsolescence health reports of the BOM using the IHS BOM Intelligence/Silicon Expert tool and performed MPN/MFR match analysis
- Analysed the impact of Product Change Notices (PCN) i.e., Errata/FFF/Non-FFF and End of Life (EOL)/Product Discontinuance Notices (PDN) on the affected part list to provide Lead Time (LT), Last Time Buy (LTB), Last Time Delivery (LTD) dates and Years to EOL (YTEOL) as per JEDEC standards
- Validated the Full Material Disclosure (FMD) as per IPC-1752A standards, Laboratory Test Reports, Certificate of Compliance (CoC) and customer-specific formats to determine product compliance against environmental regulations for all components used in the organisation
- Created Article Information Sheet (AIS) using JAMP AIS input support tool and imported it into chemSHERPA-AI entry support tool
- Verified Safety Data Sheet (SDS), Conflict Minerals (CMRT), Cobalt Minerals (CRT), Canadian Environmental Protection Act (CEPA), EU REACH, RoHS and CA Prop 65 regulatory compliance for hazardous materials
- Helped the team in creating Visual Basic for Applications (VBA) and macros using MS Excel to reduce the Turnaround Time (TAT) and improve the efficiency

TECHNICAL EXPERTISE

- Electronic component analysis, supplier management, design standards compliance, component library management, reverse engineering, product BOM cost analysis, cross-functional collaboration, creativity, problem-solving and teamwork
- **Office Applications:** Oracle E-Business Suite (EBS), Coupa, MS Office, Siemens Xpedition, PTC Windchill PLM, IHS Parts/BOM Intelligence, Silicon Expert, Partlinq, iPoint-systems, chemSHERPA-AI
- **Design Software:** EKTS, Simulink, Autodesk EAGLE, AutoCAD, PTC Creo View

INTERNSHIP

Industrial Automation, *Technologics Global Pvt. Ltd., Bangalore, India* **Sept 2019 - Oct 2019**

- Programmed PLC, SCADA and HMI
- Diagnosed the PLC, SCADA system, Motor Control Center (MCC) Panels and VFD Panels
- Worked with Dynamic Data Exchange (DDE), alarms and trends
- Interfaced PLC with SCADA by using Open Platform Communications (OPC)- KEPServerEX
- Interfaced PLC with Variable Frequency Drives (VFD)
- Designed and wired relay logic, control panels and Motor Control Center (MCC) panels

Renewable Energy, *Karnataka Power Corporation Ltd., Bangalore, India* **July 2018 - Aug 2018**

- Measured meteorological parameters using instruments like Anemometer, Barometer, Hygrometer, Thermometer and Photometer
- Designed a Solar Home System by considering several factors such as sizing of solar panels, selection of site, solar panels, protection systems, inverters, batteries, etc.
- Overviewed the guidelines for Installation, Commissioning, Operation and Maintenance of PV systems.
- Used PVWatts Calculator to estimate the energy production and cost of energy of PV systems.
- Submitted a detailed report on estimating electrical load in a house and calculating payback time for PV systems.

PROJECTS

Aqua Drone - Water Waste Collector and Water-Air Quality Monitoring in IoT Environment
(Team Size: 4)

- Designed a prototype to collect the floating debris and analyse the water-air quality with high performance, real-time and accuracy.
- Developed the system using the ESP8266 NodeMCU Wi-Fi Devkit with pH and DHT11 sensors.
- Employed C programming language and ThingSpeak API for coding and displaying the results.
- Adapted the Radio Frequency System for Wireless Communication.

General
